

SORG AND GRENZEBACH JOIN FORCES TO OFFER A SINGLE SOURCE

Nikolaus SORG GmbH & Co. KG is strengthening its partnership with Grenzebach Maschinenbau GmbH, a leading automation solution provider for the global glass, building materials and intralogistics markets.

The two family-owned companies are combining their specialist know-how with the foundation of **GS Engineering GmbH (GSE)**. The new business will complement the unique strengths of Nikolaus SORG and Grenzebach by providing solutions for works planning, architectural and construction planning, and complete media and power supply planning.

Project management, construction supervision, commissioning (up to technical assistance) and production support are also part of GS Engineering's range of services.

The combination of Nikolaus SORG's unrivalled expertise with Grenzebach Maschinenbau's passion for innovation will allow customers to benefit from an even more holistic service, while also receiving the tailored assistance they expect.

GS Engineering GmbH (GSE) will be introduced to the whole industry at glasstec 2022 in Düsseldorf between the 20th and the 23rd of September, at the booths of SORG and Grenzebach in Hall 15.
